# Introducing Varnish Pen by Young: The NEW Way to Apply Fluoride Varnish

Earth City, Mo., Aug. 1, 2017 – Young Dental is pleased to introduce a revolutionary new fluoride varnish product. Varnish Pen by Young is an innovative all-in-one varnish delivery system that offers a **quick, simple and mess-free** approach to varnish applications. A quick twist and easy press sends varnish right from the applicator system to the teeth, eliminating the need to double-dip, open difficult packaging and keep track of small applicator brushes. The Varnish Pen offers the clinician a very convenient method of applying fluoride varnish with improved patient acceptance.

Varnish Pen contains a single-dose 5% sodium fluoride varnish made with xylitol that provides sensitivity relief for patients of all ages. The thin, translucent **no-mix** formula is easy to handle without stringing or clumping, and is available in Mint and Assorted (Mint, Grape and Bubblegum) flavors.

The future of fluoride varnish is finally here. For more information or to request a free Varnish Pen sample, visit [www.varnishpen.com](http://www.varnishpen.com).
