INTRODUCING SPLATTER GUARD[®] PROPHY ANGLES SAY HELLO TO A SAFER WAY TO POLISH*

EARTH CITY, MO., JULY 23, 2020 – Young Innovations is excited to introduce Splatter Guard, an innovative new prophy angle that **reduces splatter by up to 15 times*** compared to traditional prophy angles.

Splatter Guard features a precisely engineered wiper just below the prophy cup designed to significantly reduce splatter without compromising the quality of the prophy angle. Nine out of 10 hygienists who tried Splatter Guard noticed a significant reduction or complete elimination of splatter.*

"The Splatter Guard prophy angle has been in development for more than 3 years, and the timing to launch in 2020 could not be more fitting," said Ben Biesiada, Senior Marketing Manager for Young Innovations. "With heightened sensitivity around COVID-19, products that ensure a safer dental environment are more critical than ever."

Splatter Guard disposable prophy angles are available in both Vera and Young Slim styles.
